

Memo

To: DIRTcar Track Operators
From: Sam Driggers
Date: 8/6/2015
Re: DIRTcar Pro-Modifieds Rules

Several tracks have asked for the Final rules to distribute now to start planning the 2016 season. Please find attached the DIRTcar Pro-Modified Rules.

It has been our collective desire – tracks and sanction – to offer one set of common rules, it is critical we move forward with one common rule package.

For a common set to be successful, it will require 100% support from the tracks.

Please note:

- The attached are the 2016 rules with full compliance by the start of the 2016 season..
- This is a Chevy Performance 602 engine division. We have established a built engine option that will work its way out over three years.
- This is a one tire division
- We have implemented the decaled shock program. To be clear, this is a manufactures driven program with the **approval decal coming from the manufactures**. Your tech official or the DIRTcar officials do not apply the decals. Existing shocks that meet the approval list will be inspected and decaled by the manufacture.

This program has been extremely successful in the DIRTcar Sportsman Modifieds in the Northeast. It has ended the shock war and been accepted by the suppliers as well as the teams.

- We have eliminated the exotic rear suspensions.

This rules document will be distributed and available as a separate document from the complete rule book.

Thank you for your support.
