2016 Rule(s) Bulletin

Bulletin: 2016 - 1 - July 7, 2016

The following is a revision/addition to the

2016 UMP MODIFIED General Rules and Specifications.

Effective Date: July 1, 2016

Section: 15.7 Suspensions

C. Axle Housing Mounts

- 1) Aluminum birdcages will not be permitted.
- 2) **Only one (1) axle housing mount per side will be permitted.**
- 3) **Axle housing mounts may be a solid (welded) type or a floating type (birdcage) design.**
- 4) **The final assembled axle housing mount must be a one (1) piece mount. When a floating type mount (birdcage) is fabricated using two (2) pieces, the two (2) pieces must create a common one (1) piece pivot (barrel). The two (2) pieces must be fastened or welded together to prevent independent movement of the two (2) pieces. The axle housing mount must attach directly to the axle tube with clearance only to permit rotation of the entire mount. Fore, aft or vertical movement of the mount or the axle housing within the mount will not be permitted.**

Sam Driggers

DIRTcar Racing Director
